✓ Cancel claim 9 and add new claim 10 as follows:

New Claim 10

14. 10. Apparatus for sensing characteristics of regions at and under a seafloor, comprising:

an array comprising a plurality of transducers that each can generate a sonic beam, and a plurality of sonic detectors that can detect sound;

circuitry connected to said plurality of transducers to energize them one at a time with an electrical pulse to generate a narrow sonic beam, said circuitry connected to said detectors to receive signals representing a sonic echo of each sonic beam;

said plurality of transducers being arranged in at least one row;

said sonic detectors include at least three detectors and said detectors are interspersed with said transducers, with each transducer associated with an
